EDUCATION

University of Michigan

Ann Arbor, MI

B.S. Computer Science & Information Science (Data Analytics), Minor in UX Design

Expected May 2027

- **Relevant Coursework:** Product Design, Web Design, Deep Learning, Data-Oriented Programming, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

ML Engineer Intern

Detroit, MI

American Airlines

Jan 2026 - Present

- Spearheaded cross-functional collaboration with product teams to build ML models, predicting pilot training success and diagnosing causes of training sequence spoilage, enabling data-driven improvements in training efficiency & optimization
- Prioritized interpretable, high-impact features across 12K+ OE (training) sequences and 300+ variables, optimizing for recall to surface decision-ready spoilage risk signals for training planners, capturing ~76% of spoiled/non-spoiled sequences

Product Manager, Growth

San Francisco, CA

Lyra AI

May 2025 – Aug 2025

- Led 0-to-1 development of GPT-4 driven essay drafting feature that converts rough inputs into application-ready essays; set and achieved OKRs of $\geq 80\%$ CSAT and $\geq 50\%$ retention rate
- Conducted 52 user interviews and iterative UX testing to refine user personas and optimize MVP landing page prototypes, driving a 34% lift in site traffic and 600+ signups in 2 weeks
- Delivered on Q2 goal of reducing early drop-off by diagnosing key pain points and running targeted A/B tests, increasing in 21% signup conversion through streamlined onboarding process and feature prioritization
- Worked cross-functionally with engineering, design, and marketing to scope experiments, define launch criteria, and ship growth features that improved activation and retention

Product Analyst

Boston, MA

GoDaddy

Jan 2025 – May 2025

- Resolved 91% of data inconsistencies in 1M+ small business records using SQL & R, supporting roadmap planning and product teams to target high/low-adoption segments to maximizing AI adoption
- Built & deployed an internal RShiny dashboard to monitor adoption, retention, and churn KPIs, enabling teams to detect trends 3 days faster and cut manual reporting time by 30%
- Boosted AI feature engagement by 17% by leading user interviews with small business owners to identify pain points, followed by usability tests and A/B testing during MVP development of an AI-powered market trend forecasting feature

Product Management Intern

San Diego, CA

Pulse Beverages

May 2024 – Aug 2024

- Led the launch of the company's e-commerce website using HTML, CSS, and JavaScript; integrated Stripe for payments and collaborated with design team to optimize checkout UX
- Launched 2 mocktail flavors in pilot markets, executing flavor A/B tests, packaging iterations, and usability studies, driving 1.2K purchase-page clicks and increasing buy conversion by 28%

PROJECT & LEADERSHIP EXPERIENCE

President | *Product Motion*

Jan 2026 - Present

- Preparing the next generation of aspiring PMs within the U-M community through leading hands-on building real products with startups and partners such as Microsoft and TEDx, guiding members through discovery, PRDs, MVPs, and iterations

Founder | *Inferly*

Sep 2025 – Present

- Built an AI-powered vocabulary learning app using React and GPT-4 API to generate context-rich paragraphs for ESL learners, focusing on learning through context clues over rote memorization, onboarded 800+ users in past two months

ML Engineer | *NYC Taxi & For-Hire Vehicles (FHV) Fare Prediction Project*

Mar 2025 – May 2025

- Built a deep neural network on 50M+ NYC rideshare records, improving fare prediction accuracy by 22% and reducing driver idle time by 18% through prioritizing accuracy-latency trade-offs and hyperparameter tuning

SKILLS & INTERESTS

Technical Skills: Python, Java, C++, JavaScript, React, Jira, HTML, R, SQL, Tableau, Power BI, Figma, Excel, Snowflake, AirTable

PM Skills: MVP Development, Roadmap Planning, User Story Writing, A/B Testing, KPI Definition, Stakeholder Alignment, Heap Analytics, Product Analytics, Sprint Planning, PRD, GTM Strategy, Feature Prioritization, User Research, Cross-Functional Execution

Certified Professional In: Cooking, Surviving Man United seasons, Debating AI ethics, Binging WWII films, Drooling at car meets
